EDUCATION

Bachelor of Engineering — Electrical & Electronics

PROFESSIONAL SUMMARY

- Technical Product Owner with 20+ years of experience owning product vision, backlogs and delivery for large-scale Retail Banking, Debit Card, Deposits, Authorization and Regulatory Modernization platforms, leading a team of 20 members.
- Trusted product partner to Tier-1 financial institutions, including Citibank NA, Bank of America & Royal Bank of Scotland where I was part of Key Initiatives IO consent order & Digital Debit card which resulted in approximate $1Millon savings by the FTE reduction.
- Strong technical fluency across Hogan/mainframe platforms, Managed the team that implemented the REST API integration (z/OS Connect, designed and implemented Digital debit card initiative in BOA Debit card systems), authorization and transaction flows, and data conversion and migration, enabling credible collaboration with architects, engineers and QA on solution design and trade-offs.
- Expert in US Payments, Retail banking and Debit card domains. Served as a Dev lead and part of building the Zos architecture by providing API connections to the legacy Hogan based mainframe Debit cards, Financial & Retail banking systems
- I was part of the TCS team that established the initial setups & Resourcing almost 300 FTEs for the Bank of America, Continuum Global Capability Centre (GCC) in Chennai.

PROFESSIONAL EXPERIENCE

Assistant Vice President — Technical Product Owner / Senior Business Analyst

Citicorp Services Pvt Ltd | *Jan 2022 – Present* | *Chennai, India*

- Led product ownership and business analysis for North America Retail Banking modernization and regulatory compliance programs like IO consent order, which resulted in approx $1Millon savings by the FTE reduction.
- Owned the product backlog, epics, technical user stories, grooming sessions and acceptance criteria using Agile/Scrum methodology, working closely with engineering on solution design.
- Partnered with Product, Technology, Operations, Risk, and Compliance stakeholders across US-based teams to align delivery priorities.
- Drove UAT strategy, defect triage, production readiness, and release certification for critical banking systems.
- Managed and mentored a 10-member global team across TPS, TTR, ALS, PSE and IMPACS systems.
- Utilized Jira, Confluence, Microsoft Visio, and HP Quality Center to strengthen delivery governance.

Key Achievement:

- Consistently recognized by US stakeholders for on-time delivery, quality execution, and proactive risk management.

Assistant Vice President / Senior Delivery Lead

Bank of America | *Jun 2015 – Jan 2022* | *Chennai, India & Charlotte, NC, USA*

- Delivered Wealth Management, Retirement Planning, Debit Cards, Authorization, and Check Exception systems.
- Served as Product Lead, Onshore Project Lead, Conversion Lead, and Production Support Lead across multiple engagements.
- Led Hogan-based Debit Card platforms, including setup, maintenance, and REST API integrations via z/OS Connect.
- Directed large-scale data conversions, system modernization, and regulatory compliance initiatives.

Anna University
